CLIENT AND SERVICE INFORMATION (CSI) SERVICE DATA

Mental Health Service data for clients was supplied by the DMH's CSI data system. Only clients receiving mental health services during the fiscal year 2005-2006 were counted. A basic principle of the Clients and Service Information system is that it reflects both Medi-Cal and non-Medi-Cal clients, and services provided in the County/City/Mental Health Plan program. This includes all providers whose legal entities are reported to the County Cost Report under the Treatment Program.

Mode: Identifies, in broad terms, the category of service, i.e., 24 Hour, Day, and/or Outpatient.

Service Function: Identifies the specific type of service received by the client within 24 Hour, Day, and/or Outpatient mode of service.

Number of Services:

Inpatient Services Only = any number of days during which inpatient services were received during the year with NO outpatient services other than "professional services" administered within the hospital.

1 = any one day during which an outpatient MHS was received.

2-5 = any two or more days, up to 5 days, during which an outpatient service was received - or - any number of days of inpatient services (Counting as one) AND 1 to 4 days during which an outpatient MHS was received.

6-10 = any 6 or more days, up to 10 days, during which an outpatient service was received - or - any number of days of inpatient services (Counting as one) AND 5 to 9 days during which an outpatient MHS was received.

More than 10 = 11 or more days during which an MHS was received or any number of inpatient services (Counting as one) AND 10 or more days during which an MHS was received.
